

Tom Ball

CAD Designer

We are pleased to welcome Tom Ball as a CAD Designer to our team. Tom is a degreed mechanical engineer with over 20 years' experience focused on machine & equipment design and engineering analysis. He has significant 3D CAD experience across multiple platforms.

He brings specific expertise in material conveying, custom fabrication, PLC controlled flat handling equipment, servos & actuators, nitrogen generation, sorting machines, multi-axis systems, and plastic injection molding.

Tom quickly and succinctly understands what is required to advance a design from concept to completion at the 'right' level of detail. With proficiencies in a wide array of 2D and 3D CAD packages he can assimilate existing components and scans into a new layout providing the client with a fully integrated solution.

Tom is based in our corporate office near Baltimore, Maryland as part of EFI Group's continued focus on providing skilled and experienced resources to effectively support client needs.
