

EFI Group

Engineers Focused on Industry

Jim Solich, P.E.

Senior Project Manager, Partner

A Manufacturing & Technology professional, Jim has 30+ years of relevant experience in manufacturing systems; including automation, packaging and filling.

Throughout his career, Jim has demonstrated the ability to solve problems with a rational toolset in order to achieve data driven solutions. Prior to joining EFI Group, Jim was Vice President of Engineering, Development & Sales at a manufacturer of performance packaging products where he helped develop and lead a customer-centric organization focused on solving customer problems related to product design, equipment design and selection, start up and troubleshooting. He also spent 10 years with a major material handling company, where he deepened his experience with overhead lifting, equipment and systems.

Jim earned his MBA from Mount Saint Mary's University and his BS in Mechanical Engineering Technology from University of Pittsburgh. He is also a registered Professional Engineer in PA, MD, IN and CA, and is also a court-recognized Expert Witness in Accident Reconstruction.
